

Umer Malik

UNITY GAME DEVELOPER

PROFESSIONAL SUMMARY

Unity Game Developer with 2+ years of professional experience building high-quality 2D and 3D games using Unity. Specialized in gameplay mechanics development, UI/UX integration, environment design, and game optimization. Strong problem-solving and debugging skills with a track record of delivering smooth, engaging, and performance-optimized gameplay experiences. Experienced in translating concepts into stable, scalable, and production-ready Unity games.

EDUCATION

Bachelor of Science in Software Engineering | 2020-2024

SZABIST University, Islamabad

EXPERIENCE

GameNock | Unity Game Developer

Jan 2024-July 2026

- Developed and maintained 2D and 3D Unity games across multiple genres including, hyper-casual, puzzle, arcade, educational, and endless runner games.
- Implemented gameplay mechanics, core systems, and UI integration, ensuring smooth player interaction and consistent game flow.
- Integrated AdMob ads (banner, interstitial, rewarded) with proper placement, callbacks, and performance considerations.
- Implemented Firebase services, including Authentication, Analytics, Remote Config, and Cloud Firestore for live data and user tracking.
- Integrated PlayFab for player data management, progression, and backend services.
- Built and consumed REST APIs for dynamic game data, live configuration, and server-driven features.
- Designed JSON-based level generation systems for scalable and easily configurable content updates.
- Implemented asset bundling and external DLL integrations to optimize build size, modularity, and performance.
- Debugged and resolved complex gameplay, UI, and performance issues across Android and iOS platforms.
- Optimized game performance, memory usage, and loading times for mobile devices.

TECHNICAL SKILLS

- | | |
|-----------------|-------------|
| • Unity | • Unreal |
| • Unreal Engine | • Blender |
| • WebGL | • PlayFab |
| • Level Design | • AR/VR |
| • C# | • Photoshop |
| • UI/UX | • Figma |
| • 2D/3D | |
-

PROJECTS

Flying Bird Simulator Endless

- [Game Link](#)
- Developed a 2D endless flying game in Unity with smooth touch controls, obstacle avoidance, and score-based progression.
- Implemented core gameplay systems, including enemy behavior, increasing difficulty, game states, and restart flow.

Crawl Out: Worm Escape

- [Game Link](#)
- Developed a 2D Escape game in Unity with smooth touch controls.
- Implemented core gameplay systems, including level progression, increasing difficulty, game states, and restart flow.

Gamisodes

- [Game Link](#)
- Developed and implemented multiple 2D games in the application.

Bank Heist Robbery Escape

- [Game Link](#)
- Developed a 3D action escape game in Unity with responsive player controls and fast-paced gameplay.
- Implemented player movement, enemy AI, navigation, and collision systems to support dynamic heist and escape mechanics.
- Designed and integrated 3D levels, environment assets, UI elements, and complete game flow (start, pause, game over).
- Optimized performance, difficulty progression, and gameplay balance to ensure a smooth experience on mobile devices.

Bike Rush

- [Game Link](#)
- Developed a 3D endless bike runner game in Unity featuring continuous forward movement on a dynamically generated path.
- Implemented bike controls and gameplay mechanics focused on collecting and delivering eggs while maintaining smooth player flow.
- Applied a curved world shader to subtly bend the straight path, enhancing depth perception and visual immersion.

Space Shooter: Alien Invasion

- [Game Link](#)
- Developed a space shooter game in Unity featuring fast-paced combat, enemy waves, and weapon systems.
- Implemented player spaceship controls, targeting, and enemy spawning mechanics to create engaging arcade-style gameplay.
- Built power-ups, weapon upgrades, and progression systems to enhance combat dynamics and player engagement.

Space Shooter: Alien Invasion

- [Game Link](#)
- Developed a space shooter game in Unity featuring fast-paced combat, enemy waves, and weapon systems.
- Implemented player spaceship controls, targeting, and enemy spawning mechanics to create engaging arcade-style gameplay.
- Built power-ups, weapon upgrades, and progression systems to enhance combat dynamics and player engagement.

Alien Fall: Landing On Mars

- [Game Link](#)
- Developed a 2D space action game in Unity to use a parachute to avoid obstacles.
- Designed and integrated levels, UI/UX elements, and game flow logic (start, in-game HUD, pause, game over) for a smooth user experience.

Luna Escape Maze Puzzle Game

- [Game Link](#)
- Developed a 2D logic puzzle game in Unity with maze navigation, obstacle logic, and level progression.
- Implemented player movement, puzzle mechanics, and logic conditions to create engaging and brain-challenging levels.
- JSON-Based Levels.
